-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 June 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-7 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-7 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

1. This Final office action is in response to Applicant's amendment filed June 13, 2005. Claims 1-7 are pending.
2. Applicant's arguments filed June 13, 2005 have been fully considered but they are not persuasive.

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ralston et al (USPN 6,389,454), in view of Straube et al (US 2002/0007287).

As per claim 1, Ralston et al discloses a method for scheduling appointments (scheduling system 10, see Figure 1) comprising, sending a task request from a client to a server system (client 20 request to schedule server 80 and remote schedule servers 38, 48, 58, see column 4, lines 38-42 and column 5, lines 21-24), the task request including patient identification (see column 4, lines 50-53) and resource identification (i.e., specific facility, see column 4, line 56), loading the associated patient schedule and resource schedule from a database into the local memory (servers 38, 48, 58 access data from facilities 35, 45, 55, and transmit to

server 80, see column 5, lines 24-27) if said schedules are not available at said server system, and determining available times for the resource schedule at the server system (server 80 generates appointment candidates, see column 5, lines 27-28). Ralston et al does not explicitly disclose determining, at the server system, whether schedules associated with the patient identification and resource identification are stored in local memory to the server system. Straube et al discloses an electronic document delivery system (§ 0004), including time of a patient's next appointment (abstract). Further, when a user requests information (i.e., appointment time) from database server 111, the system first checks for a more recent local copy of the information, before retrieving the information from data warehouse 112, thereby avoiding a lengthy download (§ 0038). Straube et al also discloses providing a seamless and secure integration with scheduling systems (§ 0042), therefore it would have been obvious to one having ordinary skills in the art at the time the invention was made to include checking a local database server for the information in Ralston et al, as seen in Straube et al, as an efficient means of determining and retrieving information, thereby avoiding lengthy downloads.

As per claim 2, Ralston et al discloses the determining available times step beginning from a start timestamp provided in the task request for a period of time (client appointment preference data, including date and time, see column 4, lines 55-56).

As per claim 3, Ralston et al discloses the determining available times step of moving to a next time period of time if not available times for the resource schedule are found (determined via the resource availability mask, see column 4, lines 41-43).

As per claim 4, Ralston et al discloses wherein after the determining available times step, at least one available time being transmitted from the server to the client (see column 5, lines 63-65).

Claim 5 is rejected based upon the rejection of claim 1, since it is the system claim corresponding to the method.

As per claim 6, Ralston et al discloses a client coupled to the server system via a transmission medium (transmission medium 70, see column 4, lines 41-43).

As per claim 7, Ralston et al discloses a database coupled to the server system (data from facilities 35, 45, 55, see column 5, lines 24-27).

Response to Arguments

5. In the Remarks, Applicant argues that neither Ralston nor Straube disclose determining, at the server system, whether schedules associated with the patient identification and resource identification are stored in local memory to the server system. Applicant also asserts that any checking of a database done in Straube is done at the client's computer. The Examiner respectfully disagrees. Straube discloses that the client 101 and 103 may store a copy of the information on local computer 101 and 103 **as well as** on database server 111 **or** in databases 108, 110, and 112 (¶ 0037). Further, Straube discloses the user requesting information from

database server 111, wherein the system first checks for database server 111 first (i.e., local to the server), before retrieving the information from data warehouse 112 (¶ 0038).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andre Boyce whose telephone number is (571) 272-6726. The examiner can normally be reached on 9:30-6pm M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tariq Hafiz can be reached on (571) 272-6729. The fax phone number
